DEDICATED SAFETY ROLE **NON-PARTICIPATING OBSERVER**

DRILL SAFETY OFFICER CHECKLIST

Authority to Halt Training at Any Moment

> **Mandate:** When an officer is not present, you are the department's front line against preventable injuries. You do **not** handle hoses, raise ladders, or swing tools during live reps. Your eyes stay 100% on the firefighters, the apparatus, and the ground.

1. PRE-DRILL SAFETY SCAN (BEFORE REPS BEGIN)

- **PPE Inspection:** Pants over boots, coat zipped/velcroed, hood tucked under collar, helmet chinstrap snugly fastened under chin, structural/extrication gloves on, safety glasses worn.
- **WorkSafeNB Reg 91-191 Jewellery Rule:** Verify 100% of rings, wristwatches, and neck chains are removed before donning gear.
- **Ground Hazards:** Check bay apron and driveway for black ice (salt/sand ready), trip hazards, loose cribbing, and traffic safety.

2. ACTIVE SURVEILLANCE DURING LIVE REPS

- **Ergonomics & Lifting:** Watch for members lifting with backs instead of legs during ladder carries, bottle swaps, or hose rolls.
- **Pinch Points:** Fingers on ladder beams (not rungs); hands behind hydraulic tool safety guards; body positioned outside tool kick zones.
- **Pressurized Lines:** Ensure members do not straddle uncharged hose lines; warn of nozzle reaction kick; confirm backup firefighter is anchored behind nozzleman.
- **Air & Heat Exhaustion:** Minimum 4,000 PSI before starting reps; watch for hyperventilation, dizziness, or fatigue. Water/electrolytes ready.

🛑 THE EMERGENCY STOP AUTHORITY

If you see a slip, dropped tool, missing glove, coupling leak, sudden fatigue, or immediate hazard:

SHOUT: "STOP! STOP! STOP!" OR "FREEZE!"

Everyone must cease movement, idle down throttles, and stand in place until cleared.

3. POST-DRILL SAFETY CLEARANCE & RESET

- Ensure members doff gear in a well-ventilated area to minimize particulate exposure; wipe skin with decontamination wipes.
- Inspect tools for cracks, hydraulic leaks, or structural fatigue before stowing back in brackets.
- Confirm no injuries occurred. If any member sustained a minor strain or scratch, log it immediately on the department incident report.
